REAL TIME RESULTS

- In-field nitrate readings
- Coming soon! Ammonium and potassium sensor
- Results take five minutes from sample to completion versus waiting for lab results
- 360 SoilSCAN is rugged and portable and works well on ATVs or pickup trucks

360 SoilSCAN

TECHNICAL SPECS

- Combine a specific volume of deionized water to a specific volume of soil
- Mix soil and water into slurry so ions can be detected
- Measure the amount of nitrate ions present

SENSE

Sense the nitrate you have in your field in real time with **360 SoilSCAN™**.

DECIDE

Incorporate those results into **360 Commander™** and receive a customized variable rate nitrogen prescription.

APPLY

Implement with **360 Y-Drop™** to feed your corn and deliver the nitrogen where your crop needs it.
