CAPTURE YIELD POTENTIAL

- Deliver inner canopy coverage for a wider window of crop applications of various liquid sprays (fungicides, insecticides, nutrition products, etc.)
- Take control of late-season disease and insect infestations with complete coverage
- Each unit operates up to six multi-directional spray nozzles in a hard shelled housing
- Increase product efficacy by delivering maximum target coverage when and where you need protection
- Mount 360 UnderCOVER to 360 Y-Drop™

360 UnderCOVER

TECHNICAL SPECS

- Multiple nozzle types can be placed in 360 UnderCOVER to allow for a customized spray pattern and droplet size, specific to each part of the plant and target pest
- Target spray applications with 40-degree variance flexibility
- Easily retrofit 360 UnderCOVER to major sprayer manufacturers
- 360 UnderCOVER allows for vertical placement inside the canopy and directed spray at the target

Targeted Application

360 YIELD CENTER SYSTEM FIT

SENSE

New sensing technologies combined with 360 Yield Center agronomists monitor plant health and communicate current crop status to **360 Commander™**.

DECIDE

Satellite imagery from within **360 Commander™** will help you decide what action to take.

APPLY

Take control with **360 UnderCOVER™**. Apply the solution accurately to the area needing attention.
